

# Where do animals like to live?

## Habitats

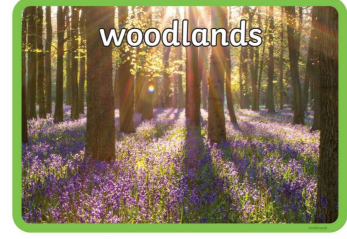

rainforest

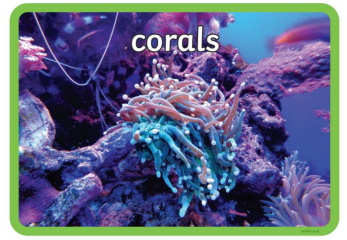

desert

Arctic

woodlands

corals

African Plains

Can you think of any other habitats?

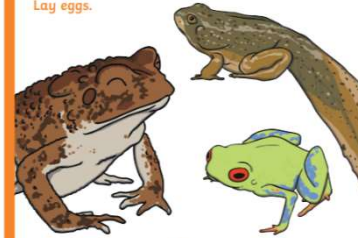

## Mammals

Are **warm-blooded**.  
 Live on land and in water.  
 Have hair or fur.  
 Have skeletons on the inside of their bodies.  
 Give birth to live babies which drink their mother's milk.

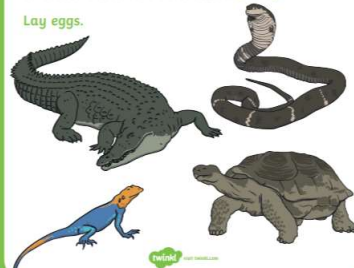

## Amphibians

Are **cold-blooded**.  
 Live on land and water.  
 Have moist skin and webbed feet.  
 Have skeletons on the inside of their bodies.  
 Lay eggs.

## Reptiles

Are **cold-blooded**.  
 Live on land and in water.  
 Have scales, ear holes and dry skin.  
 Have skeletons on the inside of their bodies (but tortoises have one on the outside, too!).  
 Lay eggs.

## Insects

Are **cold-blooded**, though their blood (actually called haemolymph) is not like ours as it does not carry oxygen or carbon dioxide.  
 Live on land and in water.  
 Have bodies in 3 parts and most insects have 2 pairs of wings.  
 Have skeletons on the outside of their bodies.  
 Hatch from eggs and often change their bodies (for example, a caterpillar changes into a butterfly).
