

### Red Class Remote Learning

The Reception children will be set five or six activities daily on Tapestry. The activities will consist of a short directed input (either pre-recorded teaching from the teacher, or a link to an online clip), followed by suggestions of extension activities and challenges. The children will always have a daily phonics session and a daily maths session, the other activities will be based on the topic (currently People Who Help Us).

It is important to remember that, when the children are in school, they have regular opportunities for free-play and outdoor learning in between the directed inputs. We would not expect the children to sit through all of the directed inputs in one sitting, so remember to give the children regular breaks to follow their own learning.

We ask parents to give feedback via Tapestry, either commenting on how the child has done, taking photos or video recordings of the child's work.
